

Update: MSIE-Telnet-Patch-2008-0001

Date: January 3, 2008

Affects Version(s): All

The file IE7_telnet.zip file contains a Windows registry patch to allow Internet Explorer to open a Telnet session through the Web interface. IE7 stopped supporting Telnet connectivity to enhance security.

If this patch is not applied clicking on the Telnet tab on device menus will fail.

To apply the patch:

- 1) Extract the IE7_telnet.reg file from the zip file to any directory
- 2) Through Windows Explorer double click on the IE7_telnet.reg file to apply the patch
